

SIRIO FRAME

The Sirio Frame is an innovative luminaire providing a decorative frame of light. The square panel outline designed for the ceiling, illuminates an indoor space just as effectively as the more common full panel. The fire barrier is maintained as the ceiling tile is in place. It offers a high lumen output of 4000 lumens and a longer life span as there is no discolouring concern, but still with a beam angle of 120°. Ideal for commercial applications.
